

## **A RESEARCH COMMUNITY IN SUSTAINABILITY AND ARTIFICIAL INTELLIGENCE**

The International Research Center in AI - IRCAI (Slovenia), the Data-Pop Alliance (USA), the ELLIS Unit Alicante Foundation (Spain), the Knowledge 4 All Foundation (UK), the UNESCO Chair in Analytics and Data Science at University of Essex, and the Regional Center for Studies on the Development of the Information Society - CETIC (Brazil) have established NAIXUS - a global network of AI centres of excellence for sustainable development.

The founding partners and all members are dedicated to connecting the best researchers and projects and helping them build a community dedicated to solving sustainability challenges by facilitating international research collaboration.

The network promotes international research collaboration and discussions among various stakeholders, and facilitates the implementation of projects that lead to the establishment of thematic dialogue at all levels, using artificial intelligence to find immediate and long-term solutions to sustainable development goals of the UN.

The members of this network recognise that collaboration at the international level between all stakeholders contributing their knowledge, experience and solutions is the key to progress and the only way to take much needed immediate action and achieve concrete results that go beyond dialogue. Members share the awareness that the implementation of the 2030 Agenda depends on deepened collaboration within the global community.

We, NAIXUS members, are profit and non-profit institutions that generate knowledge, i.e. conduct research, analysis and/or data collection, we are universities, research institutions, foundations or civil society groups. We are a network of institutions with deep expertise in one or more areas related to artificial intelligence and sustainable development, all of which we leverage to find and/or implement AI solutions for the SDGs.

For more information about NAIXUS' mission, a list of members, projects, calls to action, and contact information, visit [NAIXUS.net](http://NAIXUS.net).
